

REGIONAL WORKFORCE STATISTICS

The Counties of Blair, Centre, Clearfield, Clinton, Huntingdon, Mifflin and Union

Mean usual number of hours worked for all workers by county

Percent of workforce employed more than 26 but less than 50 weeks in the previous calendar year by county

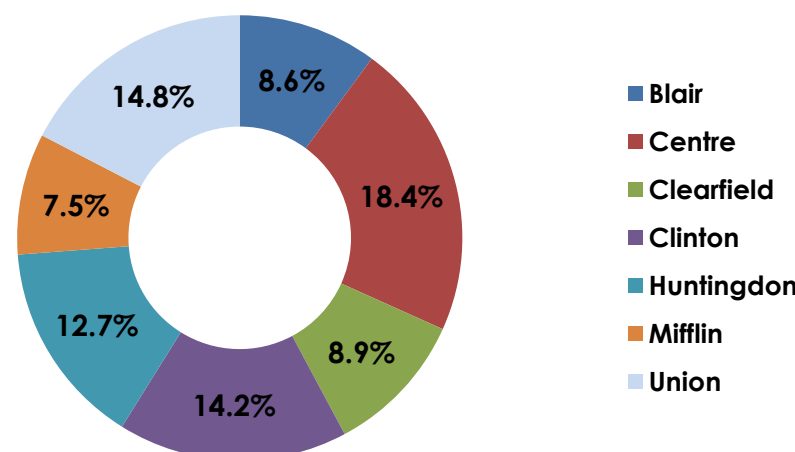

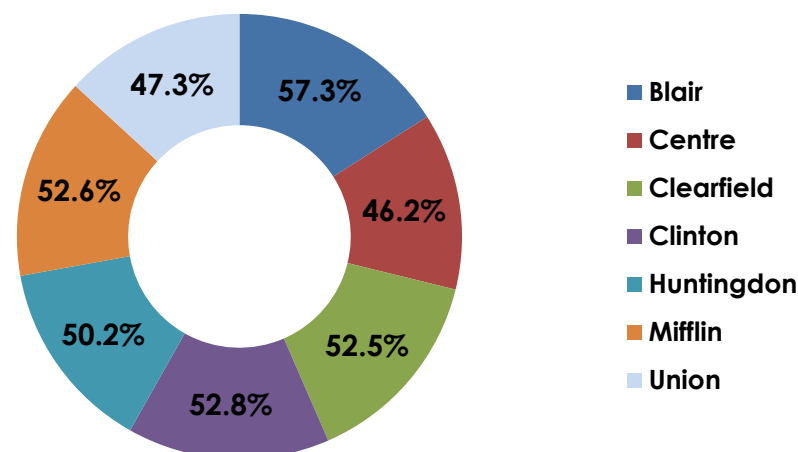

Adult population age 16 to 64 by county: Percent of workers employed more than 6 months, percent of workers employed less than 6 months, and the percent of the population that did not work in the previous calendar year

County	Percent (%) of workers employed more than 6 months	Percent (%) of workers employed 6 months or less	Percent (%) of population that did not work
Blair	67.7	8.6	23.6
Centre	60.4	18.4	21.1
Clearfield	63.7	8.9	27.4
Clinton	62.1	14.2	23.7
Huntingdon	61.3	12.7	26.1
Mifflin	63.7	7.5	28.8
Union	57.7	14.8	27.5

All workers includes both full-time and part-time workers of both sexes in the adult population age 16 to 64 in all occupations. The workforce is considered the adult population age 16 to 64, regardless of employment status.

Percent of workforce employed 50 to 52 weeks in the previous calendar year by county

Percent of workforce employed 26 weeks or less in the previous calendar year by county

Summary: For the adult population age 16 to 64 (the workforce), the percent of persons working full-time or near full-time is fairly comparable across all counties. For the percent of the population that worked 6 months or less, Centre County has a slightly higher percentage due in large part to the Penn State University population.

Work Status continued: Counties of Blair, Centre, Clearfield, Clinton, Huntingdon, Mifflin and Union

For people age 16 to 64 who were employed 50 to 52 weeks in the previous year, there is some variation between the percent of each county's workforces that reported usually working 35 or more hours a week.

For that same age bracket and the number of weeks employed, the percent of each county's workforce is more similar for those people reporting have worked between 15 and 34 hours a week.

The figures are even closer between each county's workforce for the percent of people employed less than 15 hours per week yet employed 50 to 52 weeks a year.

Usual hours worked if employed 50 to 52 weeks in the previous calendar year

Percent of the adult population age 16 to 64 in all counties; figures do not add up to 100% because people in this age bracket who reported to have not worked were counted as part of a county's entire workforce. Those figures shown in table on page 1.
