MAXIMIZE YOUR SAFETY WITH CodeRED

CodeRED™

Centre County Government, through the Department of 9-1-1, subscribes to an emergency communications network known as OnSolve. Onsolve CodeRED is a mass notification system used to alert the public about high level situations or incidents that may impact your safety. When seconds count, you can rely on CodeRED to notify you if your jurisdiction experiences any situation that requires immediate public awareness. This system allows large numbers of people to quickly receive targeted emergency notifications. Thousands of messages sent simultaneously. As a local resident of Centre County, Pennsylvania, we encourage you to take action and register your home address, home phone number, cell phone and email address for this free service. Enrollment into the program is completely voluntary by the individual.

Centre County 911 is used for:

• Missing Persons	• Set-up/location of emergency shelters
• Escaped Inmates	• Bank Robbery
• Criminal Activity	• Active Shooters
• Emergency Evacuation Notices	• Power Outages

How does it work? It is based on the location of the incident -- where the incident is taking place. Those who live within the targeted area of the incident (*radius or circumference chosen by the activating authority*) will receive the emergency message. If you live outside of the targeted area, you will not receive the alert. When the event is over, a second statement is issued cancelling the alert. You will need to logon to the website to enroll.   [Click here to enroll.](#)

You must enroll your phone number, email address, street address in order to get alerts.

A better and most preferred option is to download the APP – it's free!   We strongly recommend the App. It was designed for the traveler, to keep users safe & informed while on the go across the state or country. But we found by using it, you will be notified of all alerts in your area, and the areas in which you are traveling through across the state or country. It uses the navigation system on your cell phone.

Important Info about the APP:
- *you must turn on your navigation device on your phone for this to work.*
- *heavy battery usage.*
